

SERVE THE PLANET 2018

Module 2: Study Circle Part 3

Energy Use in Daily Life: TRANSPORTATION

Outline

- ▶ Meaning of Transportation and its evolution
- ▶ Modes, elements and energy sources
- ▶ Environmental impact of energy use in Transportation
- ▶ Transportation and energy saving
- ▶ Ceiling on Desires and energy saving tips

The purpose of this study circle is to better understand the impact of our transportation use on the planet, and how it can be used responsibly to make the planet more sustainable.

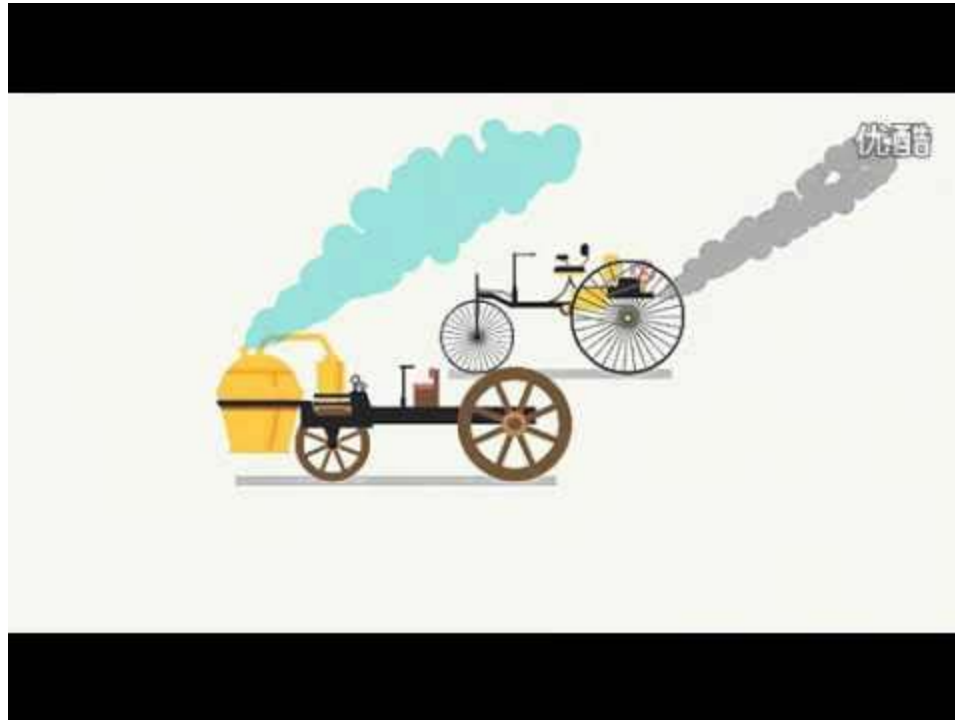

Meaning of Transportation

- The movement of people or goods from one place to another
- A vehicle or system of vehicles, such as buses, trains, etc. for getting from one place to another

Evolution of Transportation

Modes of Transport

Land

Air

Water

Elements of Transport

Vehicle

- Device used to move people and goods

Infrastructure

- Fixed installations that allow a vehicle to operate

Operation

- Entity which operates the vehicle

Energy Sources in Transportation

Gasoline

- Cars, Motorcycles, Light trucks, Boats

Diesel Fuel

- Trucks, Buses, Trains, Boats, Ships

Jet Fuel

- Airplanes, Helicopters

Residual Fuel

- Ships

Bio Fuel

- Cars, Buses, Trucks, Boats, Ships

Natural Gas

- Cars, Buses, Trucks

Propane

- Cars, Buses, Trucks

Electricity

- Cars, Motorcycles, Buses

Hydrogen

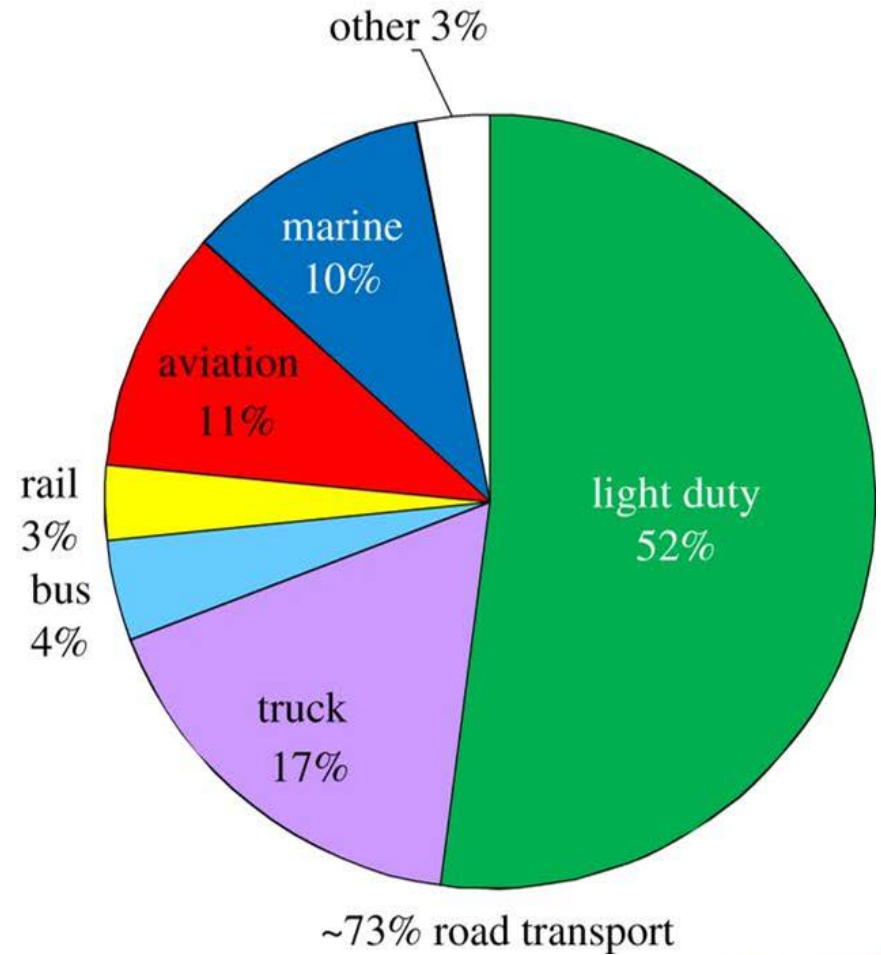

- Cars, Buses, Space rockets

Environmental Impact of Transportation contd.

Energy Consumption and Pollution

Air Pollution

Noise Pollution

Land Consumption and Landscape Damage

Ecological Degradation

Environmental Impact - CO₂ Emissions from Passenger Transport

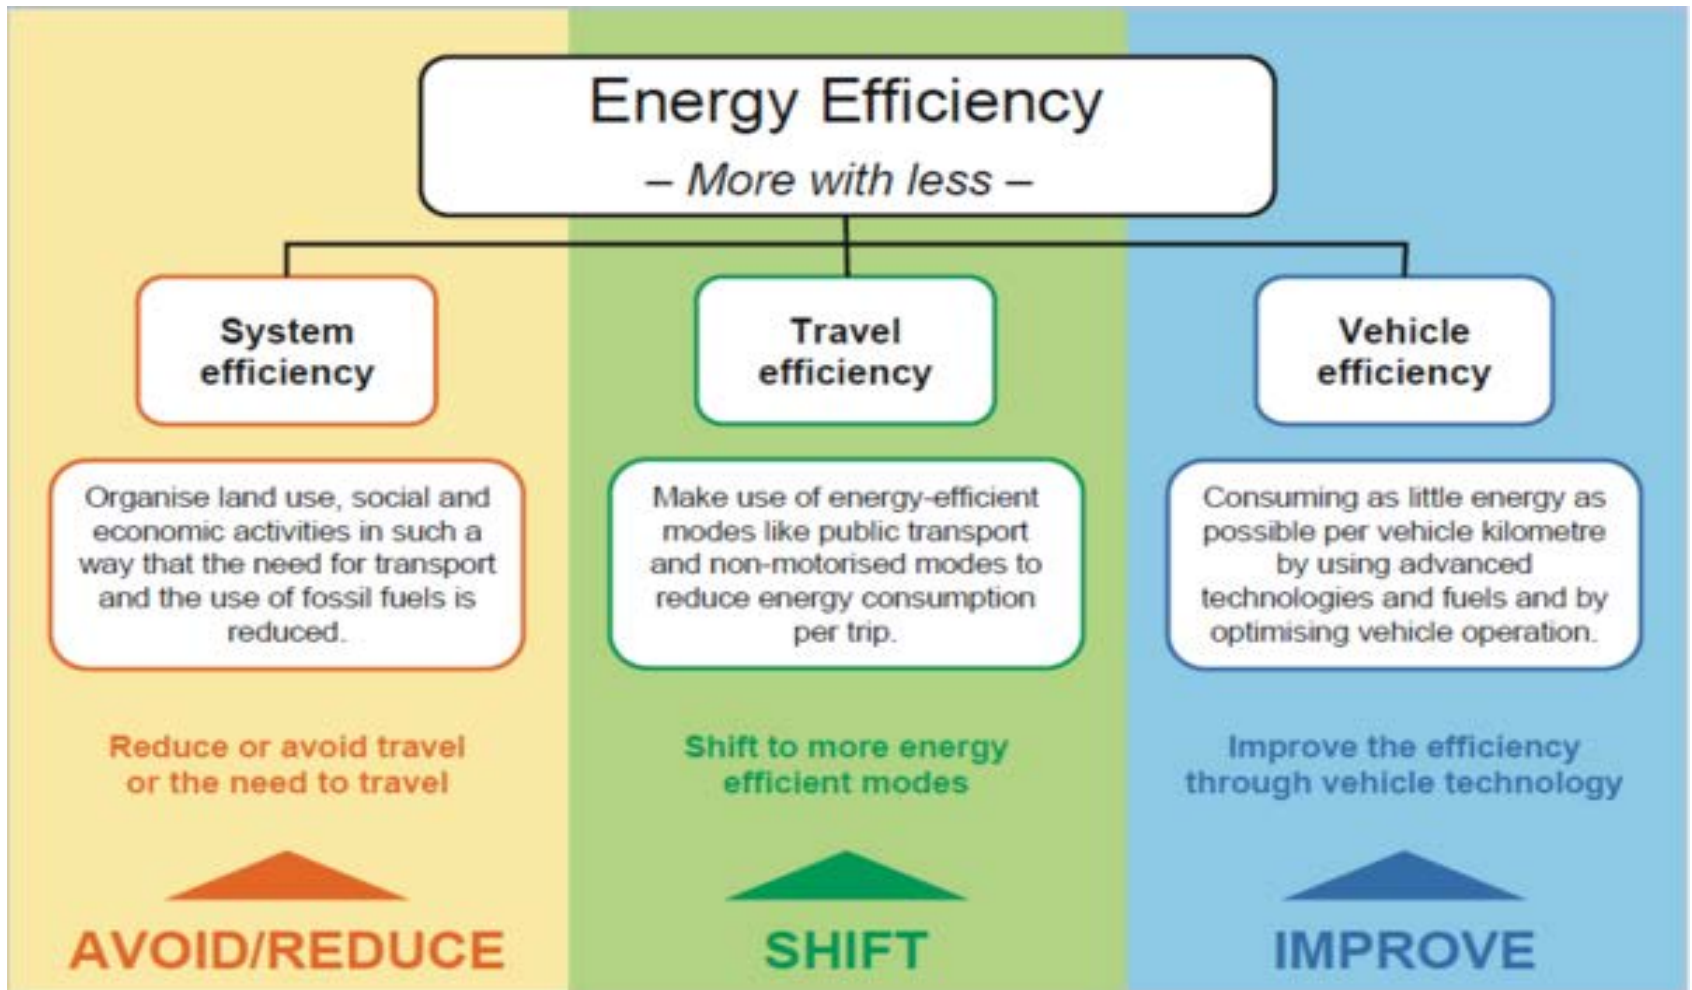

Note: The figures have been estimated with an average number of passengers per vehicle. The addition of more passengers results in fuel consumption - and hence also CO₂ emissions - penalty as the vehicle becomes heavier, but the final figure in grams of CO₂ per passenger is obviously lower. Inland ship emission factor is estimated to be 245 gCO₂/pkm but data availability is still not comparable to that of other modes. Estimations based on TRACCS database, 2013 and TERM027 indicator.

Ceiling on Desires on Transportation

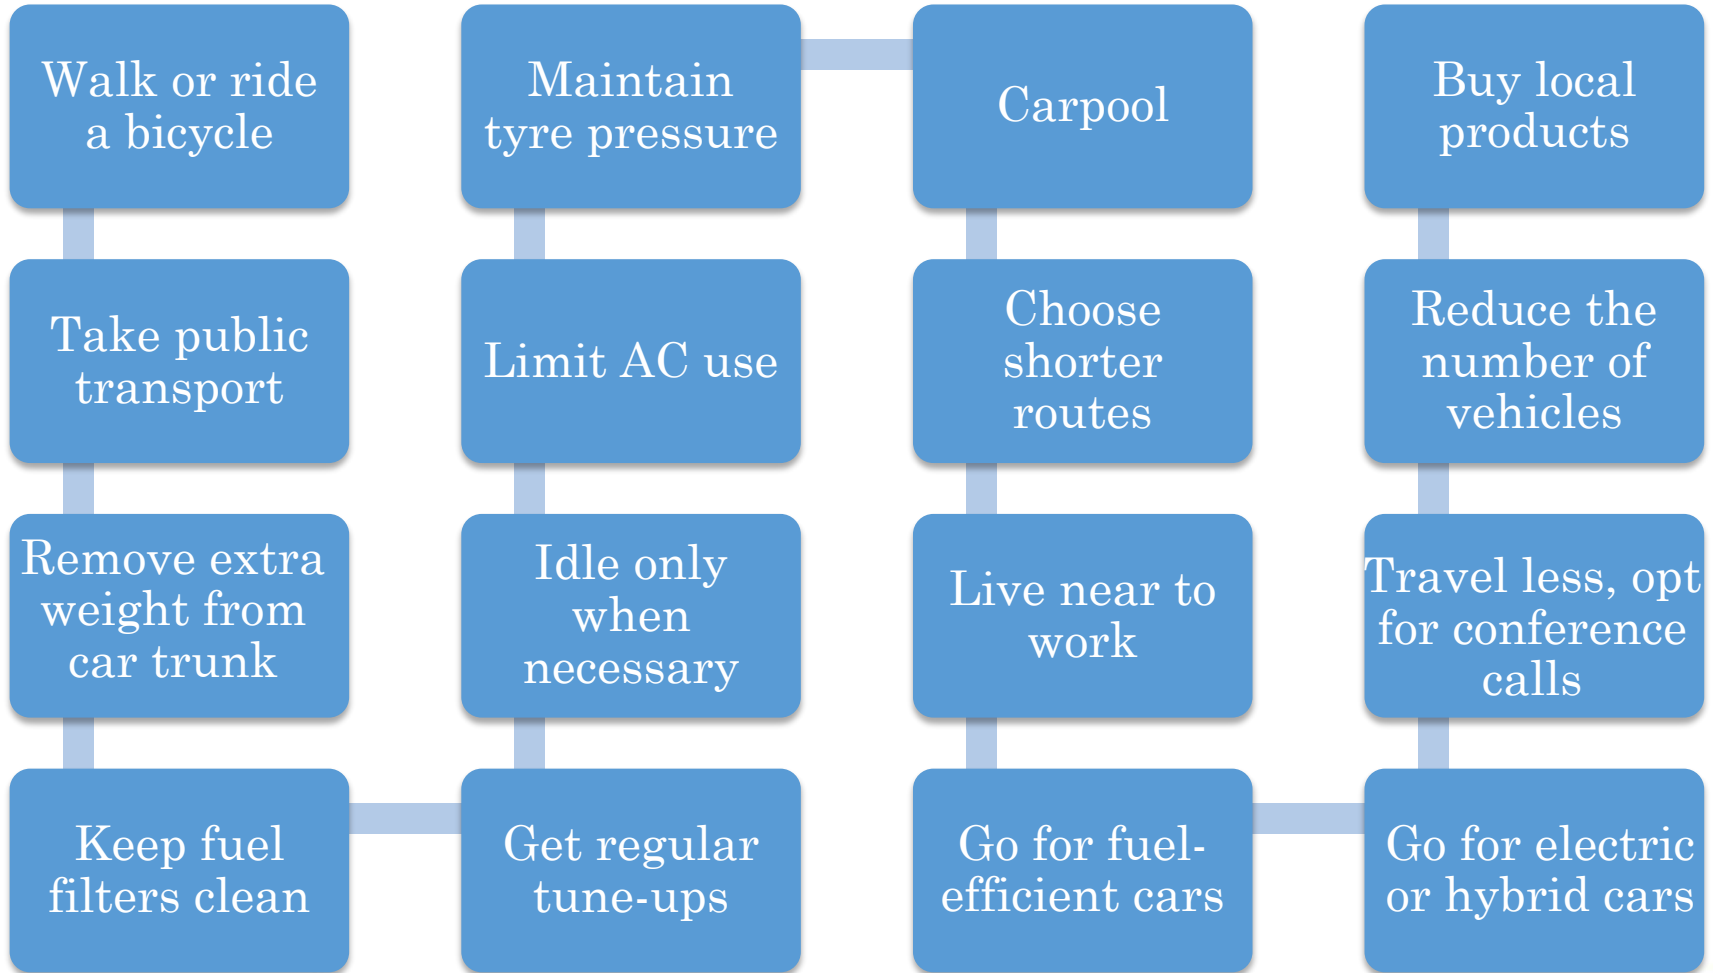

“Though man is eager to attain peace, he confronts many obstacles in the path. Those who travel by train may be well acquainted with the slogan, “Less luggage, more comfort, make travel a pleasure.” Now, man is burdening himself with limitless desires. Because of this extra heavy luggage of desires, he finds it extremely difficult to carry on the journey of life. By such proliferation of desires, he loses his balance, moves far away from his goal, and even tends to go mad.

It is for this reason that I have been stressing the need for ceiling on desires. By limiting your desires, you can attain peace to a certain extent. You have to exercise a check on your desires and make comforts to get the Grace of the Divine.”

– Sathya Sai Baba (SSS 31.18: April 25, 1998)

Energy Saving Tips in Transportation

Recap

Recap

- ▶ Meaning of Transportation and its evolution
- ▶ Modes, elements and energy sources
- ▶ Environmental impact of Transportation
- ▶ Transportation and energy saving
- ▶ Ceiling on Desires and energy saving tips

In PART 4 of Module 2 study circle series, we will cover: Energy & Technology

- ▶ Technology - meaning, evolution, and advantages & disadvantages
- ▶ Environmental impact of energy use in technology
- ▶ Relation between technology and spirituality
- ▶ How can we practice ceiling on desires in relation to technology. Identifying our 'needs' versus 'wants'
- ▶ How can Technology help the environment
